

BACKENDS – SHARED STATE

- ▶ Do not check in .tfstate files
- ▶ Best is to use a backend resource.
 - ▶ S3 bucket - <https://www.terraform.io/docs/backends/types/s3.html>
 - ▶ versioned
 - ▶ encrypted at rest
 - ▶ secured

BACKENDS – S3 CONFIGURATION

```
4
5 #####
6 # S3 Backend
7 #####
8
9 terraform {
10     0 references
11     backend "s3" {
12         bucket = "aws-meetup-terraform-state"
13         key    = "demos/demo2/terraform.tfstate"
14         region = "us-east-1"
15         profile = "aws-meetup"
16     }
17 }
```
