MORE WAYS TO IMPROVE

▸ As your organization, team, and infrastructure needs grow, maintaining each individual piece of every environment will really turn into a chore.

   ▸ VPC needs a new subnet

   ▸ EC2 Sizes need to change

▸ Encapsulating different pieces of the infrastructure can save time.

MODULES

▸ Local

  ▸ Great for establishing modules initially

  ▸ Code is local and can tweak and reload quickly

▸ Source Control (GitHub)

  ▸ Great for In-House modules

  ▸ Allow for versioning by way of repo tags

▸ Public Registry

  ▸ https://registry.terraform.io

  ▸ Good for a "Standard" set of modules.

  ▸ Verified and Maintained

▸ Private Registry

  ▸ Terraform Enterprise
